SKILLS

- Java
- C#
- JavaScript
- Next.js
- TypeScript
- React
- HTML,CSS,Tailwind
- MySQL, PostGreSQL
- Docker
- Figma

LANGUAGES

- English (Fluent)
- Spanish (Beginner)

HOBBIES

- Swimming
- Playing instruments
- Writing
- Researching about my interests

PROFILE

As a computer engineering student, I am interested in learning new languages and try to keep up with them as much as possible. Lately, I am searching about DevOps processes and expanding my knowledge in tools like Kubernetes and Jenkins. I have a keen interest in automation, particularly in test automation, and enjoy optimizing software development workflows. So far most of the projects I have worked on have been full-stack projects.

PROJECTS

Byte § Bite   Github

Restaurant Management and Order System

- This project, aims to digitize the ordering and inventory processes between restaurants and their customers.
- This project provides dynamic menu management, secure session handling, and streamlined order processing. By leveraging modern database management principles and technologies.

DEU POG Website   Github

Website for Proje ve Oyun Geliştirme Kulübü

- It was created for a school club using the Notion API and modern development languages.

My Personal Website   Github

Website for my personal portfolio

- I created this website for my profession.

EDUCATION

Dokuz Eylül Üniveristesi   2022 - 2026

Computer Engineering (Eng.)

GPA: 2.61

Kırıkkale Fen Lisesi   2018- 2022
